

**President of the Russian Federation
The Kremlin Senate, Moscow
April 20, 2014**

Your Excellency President Vladimir Putin

This is my second letter to your Excellency.

Please accept my sincere congratulations on the occasion of your repeated election to the president of the Russian Federation. This is the best choice that Russian Federation citizens have made by voting for prosperity and security of the Russian Federation, for allied Armenia and for the whole world at large.

My first letter I wrote to you in November 27, 2013 which was a few days before your historic visit to Armenia.

In that letter I provide you my plan – how to connect Armenia and Russia together, building Trans Caucasian Underground Railroad. That is the only way that we – political and military allies, can have common borders and full scale economical relation, connecting Northern Ocean with Indian Ocean.

Your Excellency, April 24th is not just a day of sorrow for Armenians, but also for other nations remembering the 99 years anniversary of Armenian Genocide, planned by International Zionism and executed by the Young Turk Government in Turkey 1915 which later became allies to Bolshevik Russia.

After one year it will be the 100th anniversary of the Armenian genocide...

After the genocide more than two million Armenians were killed and all other survived Armenians been exiled to the desert or migrate other countries. We Armenians lost 90% of our Fatherland, but on the other hand that evil force that triggers the First and Second World Wars - gain a land.

I'm not really sure how Armenia Diaspora and Armenian State Coordination Commission are planning to organize the upcoming 100 anniversary of the Armenian genocide, but as usual I have my own plans.

But before that let me introduce myself...

I, a grandson of surviving victims of the Armenian Genocide (1915-1918), was born on August 7, 1948 in Yerevan, the capital of Armenia. As a senior in high school I won first prize in the national mathematics Olympiad of Armenia in 1966. I then attended the Physics department at Yerevan State University from 1966-1971 and received my MS in Theoretical Physics. After graduating from Yerevan State University I attended a Theological Seminary from 1971-1973 at Etchmiadzin, Armenia and received Bachelor of Theology degree. Then I worked at different institutions as an engineer not related to physics. For seven years (1978-1985) I was imprisoned as a political prisoner in the USSR Gulag for fighting for the self-determination of Armenia. I have been in Barashevo-Mordovia (3 years), Chistopol-Tatarstan (1 year) and Aban-Krasnoyarsk Krai (2 years). I have Armenian citizenship and from 1988 till now I have been a resident of the United States. I have many unpublished articles in theoretical physics. I have four children - three sons and one daughter.

Your Excellency, the twentieth century starts with revolutionary ideas in physical science, especially in theoretical physics and that is why it is called annus mirabilis time. And also during the same time the International Zionism where trying to take over humanity and trigger multiple revolutions and world wars just as they are doing right now.

This is also a time when in 1905 prestige physics magazines like Annals of Physics (Annalen der Physik) started printing series of articles in theoretical physics. And from that submitted articles there vanished the name of the main author - Mileva Marić, and plagiarized others discoveries. Ten years later, in 1915, submitted articles by David Hilbert to Gottingen Academy were mutilated and also plagiarized as well.

Because of this in science starts relativity priority dispute and creates the dissident scientist movement.

Those evil forces who plagiarized ideas from German, French, Dutch, Italian, Scottish, Russian and merely all European scientists in favor of only one person and making him an idol in physics and man of the century, manufacturing him for some evil agenda.

And this dishonest Zionist person - whose portrait hangs in nearly every physics department around the world, including Russia, is the greatest shame of the scientific community. If somebody who would try to criticize either of Special theory of relativity or suggest alternative theories, **then all mainstream scientific journals reject papers without review.** This is true for Russian physics journals as well, such as JETP Letters and many others...

As I understand it, after Heisenberg's quantum theory (1925) and Dirac's relativistic quantum theory (1928) – theoretical physics came to a halt. Eighty five years have passed from those days and no progress has been made in theoretical physics at all. And in that existing long lasting vacuum in theoretical physics, opportunist “physicists” (whose ethnicity is not secret) are promoting artificial and false theories like “string theory”, “super string theory”, “K theory”, “big bang theory” and so on... which is leading Europe and the whole world into another dark age.

But there is always HOPE...

For the past 45 years I have been a dissident scientist (like Professor Logunov in Russia), trying to prove what is wrong with special or general theory of relativity, as we know it now and also creating many new theories and calling them “Alternative theory of relativity” or “New theory of relativity” and so on... But later on I remembered Socrates's wise words **“The secret of change is to focus all of your energy, not on fighting the old, but on building the new.”**

That's why during the year 2012, when evil forces where preaching the end of the world, we declare the year 2012 as new miracle year and we creating **“Armenian Theory of Relativity – One Dimensional Movement”**. We register it in USA Copyright office and GB Copyright Witness office on the exact day of “the end of the world” – December 21, 2012 and we publish it as a book in June 2013 in Armenia.

100 years of inquisition in Physics is now over and Armenian revolution in science has begun!

Now we are working to finish **“Armenian Theory of Relativity in Three Dimension”** and much more...

With this letter is attached my first letter to you, in Armenian (2 pages), our original full article in Armenian (86 pages), short communication in English (4 pages), visual comparison Armenian and Lorentz relativistic formulas in English (10 pages), our letter to all researchers of truth in English (1 page) and our short biographies in English (2 pages). I am sorry to say that I don't have any resources to translate our full article in English, in Russian or in German for broader readership.

Your Excellency, please excuse my courage to ask you for a favor.

And that favor, which I like to ask you, it is not to recognize Nagorno-Karabakh independence, which is under same formulation: "For some reason, things that Kosovo were permitted to do, Russians, Ukrainians and Crimean Tatars in Crimea are not allowed. Again, one wonders why." Let me continue your logic and add my proposal: "Why Armenians in Nagorno-Karabakh not allowed, why." We done our part in UN and we vote for free will expression of nations for self-determination. Now Russians turn to do his part. But that is not which I am trying to ask you as favor to me.

My favor which I may ask you is to fix the shame in theoretical physics by presenting our article - **"Armenian Theory of Relativity – One Dimensional Movement"** to Nobel Committee for Physics for consideration to nominate Nobel Prize in Physics 2015 – 100 anniversary of Armenian genocide.

Your Excellency, this article and upcoming other articles is design to bring new renaissance in theoretical physics. This is the first step towards that goal. We believe that even one article can awaken humanity and enlighten the world once again with the whole sacred knowledge and lost wisdom of Universe.

This is truly historic time to enlighten the World with Armenian Theory of Relativity.

Two week ago I read article about Ukrainian crisis, where Israel's defense minister, Moshe Ya'alon, preached that **"This is a war of civilizations"**. I agree with him that this truly is a war with the White race and Evil race, which has been going on for already thousand of years. Those evil forces are manipulating and pushing brother nations to fight against each other, just as the conflict we see today between two Slavonic nations of Russia and Ukraine.

Also one week ago I read this article where it stated that **"I am now pretty much convinced that Vladimir Putin's Russia is the last hope for the White race."** And same article ends with question **"If Russia doesn't make any stand against the International Jewry, I don't know who will."**

I know also that the rise of white nations nationalism has gone from Western Europe to Eastern Europe, more exactly center of National Socialism right now in Russia, because of you your Excellency.

That is why I have big hope that you can help me to shape theoretical physics and make it a real science.

With great respect,

Robert Nazaryan
